

# Giant Bicolor Monkey Tree Frogs

Phyllomedusa bicolor

**Distribution:** Surinam

**Size:** 3" - 4"

**NATURAL HABITAT:** Inhabits the tropical rain forest, near the water. This species is usually calm when handled and mostly arboreal. When captive, adults require at least a 10 gallon enclosure.

**BEHAVIOR:** This species is nocturnal (active primarily at night). Usually quite docile and shy.

**CAPTIVE ENVIRONMENT:** Provide several climbing areas on branches, logs, & plants. This species like dense foliage for climbing hiding. Enclosure should be well ventilated.

**TEMPERATURE:** Maintain day temperature range between 76-82 degrees F. Maintain night temperature range between 72-78 degrees F

**HUMIDITY:** This species requires moderate to high levels of humidity.

**WATER REQUIREMENTS:** Provide a large shallow bowl for drinking and soaking. Use only dechlorinated water.

**NUTRITIONAL REQUIREMENTS:** This species is a carnivore (meat eater). Eats various insects and worms. Also feeds on small mammals such as pink baby mice.
